

AHC-85, AHC-85D and AHC-85E Discontinuance: Production and Support

Ref. No. 2011-092M

Pub Date 07/2011

Rockwell Collins offers AHC-3000 Attitude Heading Computer solutions as replacements for the AHC-85, AHC-85D and AHC-85E which have been discontinued.

Due to obsolescence of key hardware components, the production of the AHC-85, AHC-85D and AHC-85E Attitude Heading Computers has been discontinued. Rockwell Collins will continue to provide repair services for these products, but due to some parts being obsolete, we cannot guarantee that all failed units will be repairable. In the event that a failed unit is no longer repairable, Rockwell Collins can assist operators with the location of a suitable used replacement or purchase of a new replacement product.

Based on current usage, Rockwell Collins expects to run out of key components by mid-2012. All repairs are now being done on a parts available basis.

If you own an AHC-85D or AHC-85E there is a replacement available today. The AHC-3000 or AHC-3000A can be installed via STC.

If you own an AHC-85, we are presently completing development and FAA TSO on the AHC-3000C as a replacement unit for the AHC-85. We estimate TSO approval by December 2011. The AHC-3000C can be installed in your aircraft with the development of an STC after that date.

We believe these actions will minimize any disruption to your aircraft operation. For further information on the Rockwell Collins AHC-3000 or assistance in planning your aircraft upgrade requirements, including spares and certification, please contact your Rockwell Collins Regional Sales Manager or Customer Account Administrator.
